Artifact 1

My mission is to create an environment where every student is capable of learning. I will do so by forming relationships with my students where respect, trust, and caring is mutual, and all students have the belief in themselves that they have the ability to succeed. My students will learn in fun and challenging ways, and they will become lifelong contributing members of society. Ultimately I strive to make my students technologically literate so they can compete in the dynamic global market.

Artifact 2

My classroom web site is a central information source for parents that allows parents to view classroom rules, and obtain the same mission statement found above. This information is presented to parents and student in the beginning of the year. In addition to this parent are also welcome to leave comments. Th link to this section of my site is located below.
